

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

Claim 1 (Currently Amended): A unified user interface for an application comprising:  
one or more component tables, wherein each component table corresponds to a component of the application, each component table includes at least one command for the corresponding component, and each component table includes a description for adding the command to the user interface, wherein each command has an associated priority; and

a master table merged from the one or more component tables, said master table includes available command and available command vectors for the application, each command and command vector having a unique object identifier and a flag specifying visibility, and said master table comprising at least one information element from among the following information elements: available commands including commands that are not menu commands; available command vectors including command vectors that do not correspond to menu commands; commands that are on toolbars; and commands that map to keystrokes.

Claim 2 (Cancelled)

Claim 3 (Cancelled)

Claim 4 (Cancelled)

Claim 5 (Cancelled):

Claim 6 (Original): The user interface of claim 1 further comprising an additional component table and wherein the master table is merged from the at least one component table and the additional component table.

Claim 7 (Original): The user interface of claim 1, wherein a removed component table of the at least one component table corresponds to a removed component and wherein the master table is merged from the remaining component tables of the at least one component table.

Claim 8 (Original): The user interface of claim 1, wherein the master table includes available commands, menus and toolbars and the location of each available command.

Claims 9-23 (Cancelled)

Claim 24 (Currently Amended): A computer-readable medium comprising computer-readable instructions for a unified user interface for an application, said computer-readable instructions comprising instructions for:

one or more component tables, wherein each component table corresponds to a component of the application, each component table includes at least one command for the corresponding component, and each component table includes a description for adding the command to a user interface, wherein each command has an associated priority; and

a master table merged from the one or more component tables, said master table includes available command and available command vectors for the application, each command and command vector having a unique object identifier and a flag specifying visibility, and said master table comprising at least one information element from among the following information elements: available commands including commands that are not menu commands; available command vectors including command vectors that do not correspond to menus commands; commands that are on toolbars; and commands that map to keystrokes.

Claim 25 (Cancelled)

Claim 26 (Cancelled)

Claim 27 (Cancelled)

Claim 28 (Cancelled):
